

CAS Systematic Review Information Specialist

Research and publication support for systematic searching and transparent and reproducible reporting of evidence-synthesising secondary studies

The Campus MuttENZ Library, together with the University Medical Library Basel, offers a certified continuing education programme for research and publication support of systematic reviews (and related study types) at the FHNW School of Life Sciences.

Contents

The CAS programme includes learning on how to:

- Conduct systematic literature searches
- Create transparent and reproducible reports
- Provide specific methodological advice

The programme focuses on examples from various health-related fields and also draws from other disciplines wherever possible.

Target Group

The CAS programme is aimed at university graduates from all empirical disciplines. It is particularly for those in academic libraries, universities and research institutions who regularly support and/or participate in systematic review teams.

The admission criteria are set out in the programme description on our website.

Format

The CAS programme is divided into:

- 3 attendance blocks of 2.5 days each (Fri/Sat plus Sunday morning in January, February and June)
- 48 online lessons (16 evenings on Thursdays between 4 p.m. and 7 p.m. at the latest (up to 3 lessons), from January to June)
- Final thesis (approx. 50-60 hours, July to December)

Degree / ECTS

Certificate of Advanced Studies FHNW Systematic Review
Information Specialist / 10 ECTS
